DETAILED ACTION

The amendment filed February 6, 2004 is acknowledged and has been entered. Claims 28-33 and 37-39 have been examined on the merits.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 28-33 and 37-39 stand rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,450,935 for the reasons set forth in the previous Office action which are restated below.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both are drawn to a method of extracting organic components (which encompass antioxidants and essential oils) from botanical plants using similar steps including extracting with tetrafluoroethane and one or more organic cosolvents (such as those instantly claimed).

Art Unit: 1654

Claims 28-33 and 37-39 stand provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of copending Application No. 09/082,109 for the reasons set forth in the previous Office action which are restated below. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are drawn to extracting an organic component from an organic/plant material comprising similar extraction steps within a vessel comprising a blend of solvents including tetrafluoroethane and one or more organic cosolvents (such as those instantly claimed).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicants state in their February 6, 2004 that they disagree with the position of the Examiner with respect to the above double-patenting rejections but will consider entering a terminal disclaimer to overcome these rejections if an agreement as to allowable subject matter is otherwise reached (please note, the Examiner left a voice-message with Applicant's representative on April 8, 2004 concerning the filing/faxing of a Terminal Disclaimer, however to the best of Examiner's knowledge, Applicant's representative did not respond).

Art Unit: 1654

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
